ABOUT US

Sarvatah is a leading IT training institute dedicated to empowering students and professionals with industry-relevant skills. We specialize in high-demand courses like UI/UX Design, Data Science, and Data Analytics, designed to bridge the gap between academic learning and real-world industry requirements.

Our focus is on practical learning, real-time projects, and career-oriented training. With expert mentors and a structured curriculum, we help students build strong portfolios and gain the confidence needed to succeed in today's competitive digital world.

At Sarvatah, we don't just teach — we prepare you for a successful career.

WHY CHOOSE US

Industry-Focused Training

Learn skills that companies actually demand

Hands-on Live Projects

Gain real-world experience during training

Expert Mentors

Learn from professionals with industry experience

Portfolio Development

Build a job-ready portfolio

Placement Assistance

Support with interviews and job opportunities

Updated Tools & Technologies

Figma, Adobe XD, AI Tools & more

Career-Oriented Approach

From learning to earning, we guide you

Affordable & Flexible Plans

Designed for students and working professionals

Choose Sarvatah and take the first step towards a **successful IT career.**

MODULE 1:

Introduction to UI/UX

1. UI vs UX

- What is UI?
- What is UX?
- Product Design
- UX Process
- Design Thinking
- Double Diamond
- Human-Centered Design

2. Visual Design Principles

- Gestalt Principles
- Color Theory
- Typography
- Visual Hierarchy
- Layout
- Spacing
- Alignment
- White Space
- Contrast
- Accessibility Basics

3. AI Tools

- ChatGPT
- Claude
- Gemini

Use AI for:

- UX explanations
- Design brainstorming
- Learning assistance

Understand
Users

Define
Problems

Ideate
Solutions

Design
Experiences

Deliver
Impact

Learn the foundations. Build the mindset. **Design for real people.**

MODULE 2:

Figma Masterclass

Figma Essentials

- Interface
- Frames
- Auto Layout
- Components
- Variants
- Variables
- Styles
- Constraints
- Grids
- Icons
- Assets
- Libraries
- Dev Mode
- Prototyping

Design. Prototype. Collaborate.

Design

Create beautiful UI with powerful design tools.

Prototype

Build interactive prototypes and test user flows.

Collaborate

Work together in real-time with your team.

Hand off

Developer-friendly handoff with Dev Mode.

Assignment

01 Login Screen

02 Dashboard

03 Music App UI

MODULE 3 – UX Research

Learn how to understand users, validate ideas, and make data-driven design decisions.

Research Methods

UX Research Process

Primary Research

Secondary Research

User Interviews

Surveys

Stakeholder Interviews

Competitive Analysis

Heuristic Evaluation

SWOT Analysis

Feature Matrix

AI Integration

Generate interview questions

Use AI to create relevant and targeted questions.

Create surveys

AI helps in drafting smart surveys based on goals.

Summarize research

Turn lengthy notes and data into clear summaries.

Analyze competitors

Get competitor insights, strengths, weaknesses & opportunities.

Deliverables

Research Report

Detailed report with key findings, insights and recommendations.

Competitor Analysis

Analysis of competitors with strengths, weaknesses, opportunities & threats.

Interview Summary

Key takeaways and themes from user and stakeholder interviews.

UX Research Process

1. Define

Define research goals & objectives

2. Plan

Choose methods & plan research

3. Collect

Gather data from users & sources

4. Analyze

Analyze data & find patterns

5. Synthesize

Generate insights & opportunities

6. Report

Share findings & recommendations

Good research leads to great design.
Understand users. Solve the right problems.

MODULE 4 – UX Analysis

Turn user research into meaningful insights and create solutions that truly matter.

1. User Understanding

-  Affinity Mapping
-  User Persona
-  Empathy Map
-  User Journey Map
-  Pain Points
-  User Stories
-  Jobs To Be Done (JTBD)
-  Problem Statements
-  How Might We Statements

2. IA & User Flows

-  Information Architecture
-  Card Sorting
-  Sitemap
-  Task Flow
-  User Flow
-  Storyboard
-  User Scenario

Key Benefits

-  Understand real user needs
-  Identify the right problems
-  Create meaningful user flows
-  Build better digital experiences
-  Drive user satisfaction & retention

3. Project

Food Delivery App

Apply all UX analysis techniques to solve real user problems and design a seamless food ordering experience.

-  Research & Analyze
-  Define User Needs
-  Ideate & Structure
-  Create User Flows
-  Deliver Better Experience

Understand. Analyze. Design. Deliver Impact.
Good UX starts with deep understanding.

MODULE 5 –

Wireframing & Design Systems

Build a strong foundation with wireframes and scalable design systems for consistent experiences.

1. Wireframing

Sketching

Low-Fidelity Wireframes

Mid-Fidelity Wireframes

2. Design Systems

- Color System
- Typography Scale
- Buttons
- Inputs
- Cards
- Navigation
- Components
- Variants
- Design Tokens

```
Design Token (Example)
{
  "color": {
    "primary": "#2563E8",
    "text": "#1F2937",
    "bg": "#FFFFFF",
  },
  "radius": {
    "md": "8px"
  }
}
```

3. AI Tools

- Figma AI**
Generate design ideas, resize, summarize & more.
- Uizard**
Turn sketches into wireframes and screens in seconds.
- Galileo AI**
Generate UI designs from text prompts instantly.

Use AI for:

- ✓ Wireframe generation
- ✓ Design system suggestions
- ✓ Component creation
- ✓ Faster iterations

4. Project

Healthcare App

Apply wireframing and design systems to create a seamless healthcare experience.

- ✓ Consistent UI with Design System
- ✓ Reusable Components
- ✓ Scalable & Maintainable Design
- ✓ Better User Experience

Great design is built with structure and consistency.
Wireframe smart. Design scalable. Deliver impact.

MODULE 6:

High-Fidelity UI Design

Create stunning, pixel-perfect user interfaces that are functional, accessible and user-friendly.

1. Mobile UI Design

Android Guidelines

iOS Guidelines

Responsive Design

Grid Systems

Icons

Microcopy

Empty States

Error States

Material Design
Guidelines

iOS
Human Interface
Guidelines

2. AI Design Tools

Figma AI

Generate layouts, UI ideas and redesign with AI.

ChatGPT

Get UI suggestions, write microcopy and solve design problems.

Ideogram (assets)

Generate high-quality illustrations, icons and visual assets.

Use AI for:

- ✓ UI inspiration & layout ideas
- ✓ Asset generation (icons, illustrations)
- ✓ Microcopy suggestions
- ✓ Faster design iterations

3. Project

Banking App

- ✓ Design a modern and secure banking application
- ✓ Focus on usability, trust and accessibility
- ✓ Create high-fidelity screens with real-world scenarios
- ✓ Apply UI principles and responsive layouts

Key Focus Areas

User-Centered
Design

Consistency &
Clarity

Accessibility
First

Pixel-Perfect
UI

Delightful
Experience

Design with precision. Deliver with impact.
Great UI builds trust. Better UI creates loyalty.

MODULE 7:

Prototyping & Testing

Bring your designs to life with interactive prototypes and validate them through usability testing to create better user experiences.

1. Interactive Design

Smart Animate

Create smooth transitions between screens.

Interactive Components

Build reusable components with interactions.

Micro-interactions

Add subtle animations to delight users.

Prototype Sharing

Share prototypes and gather feedback easily.

2. Usability Testing

Test Planning

Define objectives, tasks, and success metrics.

Moderated Testing

Observe users and gather valuable insights.

Think Aloud

Understand user thoughts during task completion.

SUS (System Usability Scale)

Measure usability with the standard SUS questionnaire.

A/B Testing Basics

Compare design variations to find the better solution.

3. Tools

Run remote usability tests, get reports and insights with Maze.

Google Forms

Create surveys and collect feedback easily with Google Forms.

4. Deliverables

Test Report

Comprehensive report with objectives, methodology, findings, participants, metrics and key insights.

USABILITY TEST REPORT

Banking App

Executive Summary

5

Participants

85%

Task Success

78

SUS Score

12

Issues Found

Key Findings

- Users found the transfer flow easy and intuitive.
- Some users missed the filter option on transaction list.
- Payment success screen needs more clarity.
- Improve error messages and validation feedback.

Issues by Severity

Iteration Report

Document design improvements, iterations made, rationale and impact on user experience.

ITERATION REPORT

Banking App

Iteration 1: Transfer Flow

Before

After

What Changed

- Simplified steps
- Clearer labels
- Improved button visibility

Impact

Task Success Rate
+20%

SUS Score
+15

Prototype. Test. Improve.
Validate early. Design better. Deliver impact.

MODULE 8:

AI + Portfolio Projects

Leverage AI tools and build real-world projects to create a powerful portfolio that gets you hired.

1. AI for UI/UX

Prompt Engineering for Designers

AI UX Writing

AI Personas

AI Journey Maps

AI Wireframes

AI Design Critique

AI Accessibility Checks

AI Documentation

AI helps you to:

- ✓ Work faster and smarter
- ✓ Generate ideas and content
- ✓ Improve usability and accessibility
- ✓ Create better, user-centered designs

2. No-Code Introduction

Framer

Build interactive, responsive websites without code. Great for portfolios and prototypes.

Webflow (Basics)

Learn the basics of Webflow for creating responsive, publishing-ready websites.

You will learn:

- ✓ Basic layout and styling
- ✓ Components and sections
- ✓ Interactions and animations
- ✓ Publish and share

3. Portfolio Projects

Complete:

1

Food Delivery App

End-to-end UI/UX design including research, wireframes, UI design, prototype and testing.

2

Banking App

Design a secure and modern banking app with features like transfers, cards, analytics and more.

3

Healthcare App

Design a healthcare app for appointments, doctors, prescriptions and health tracking.

AI + Creativity + Real Projects = A Powerful Portfolio Build. Showcase. Get Hired.

MODULE 9:

PORTFOLIO

A strong portfolio tells your story, showcases your skills, and proves your ability to solve real user problems.

UX CASE STUDY CREATION

Each case study includes:

- 1 Project Overview
- 2 Problem Statement
- 3 Goals
- 4 Research
- 5 Competitive Analysis
- 6 User Persona
- 7 Empathy Map
- 8 User Journey
- 9 Information Architecture
- 10 User Flow
- 11 Wireframes
- 12 High-Fidelity Designs
- 13 Prototype
- 14 Usability Testing
- 15 Iterations
- 16 Final Solution
- 17 Reflection

CASE STUDY EXAMPLE – FOOD DELIVERY APP

01 Project Overview

A food delivery app that helps users discover restaurants, place orders, and track delivery in real-time.

02 Problem Statement

Users face difficulty in finding reliable delivery, unclear tracking and complicated checkout.

03 Goals

- ✓ Easy discovery of restaurants
- ✓ Smooth ordering experience
- ✓ Real-time order tracking
- ✓ Secure payments

04 Research

User interviews, surveys and market research to understand user needs and pain points.

05 Competitive Analysis

Analyzed top competitors to identify gaps and opportunities.

06 User Persona

Priya Sharma
Age: 27
Marketing Executive
Goals: Quick ordering, healthy options
Frustrations: Delays, complex checkout

07 Empathy Map

08 User Journey

09 Information Architecture

10 User Flow

11 Wireframes

12 High-Fidelity Designs

13 Prototype

14 Usability Testing

Tested with 5 users using tasks and SUS questionnaire.

15 Iterations

Improved navigation, simplified checkout and enhanced tracking.

16 Final Solution

A seamless, user-friendly experience that solves user pain points and improves satisfaction.

17 Reflection

Learnings, challenges and how I would improve the project in future.

TIPS FOR A GREAT CASE STUDY

- ✓ Focus on user needs and business goals
- ✓ Show your design thinking process
- ✓ Use visuals, charts and real data
- ✓ Be clear, concise and honest

“ A case study is not just about the design. It's about the impact you created. ”

Document your process

Show your impact

Build trust

Stand out from others

Get noticed by recruiters

MODULE 10:

AI Tools Students Will Learn

Leverage the power of AI to research, design, write, test, and build exceptional UI/UX projects faster and smarter.

 Purpose	 Tool
 Research	 ChatGPT  Claude  Gemini
 UI Generation	 Figma AI  Galileo AI  Uizard
 Frontend Inspiration	 v0  Lovable
 Wireframes	 Uizard  Figma AI
 Prototyping	 Figma
 UX Writing	 ChatGPT
 Image Assets	 Adobe Express  Ideogram
 Portfolio Website	 Framer
 Testing	 Maze

AI won't replace designers.
Designers who use AI will lead the future.

Work Faster

Think Deeper

Design Better

Create Impact

POST-PROGRAM UI/UX CAREER GUIDANCE

1

Job-Ready UI/UX Preparation

- Become industry-ready with practical UI/UX skills
- Get career guidance & portfolio support
- Confidently apply for design roles

2

Mock Interview Sessions

- Practice real UI/UX interview scenarios
- Improve communication & design thinking
- Build confidence with expert feedback

3

Professional Portfolio Building

- Create an impressive UI/UX portfolio
- Showcase case studies, wireframes & prototypes
- Highlight your design process effectively

4

Resume Optimization

- Build an ATS-friendly UI/UX resume
- Highlight tools, projects & skills
- Stand out to recruiters

5

Naukri and LinkedIn Profile Development

- Create a strong professional presence
- Optimize profile for recruiters
- Build valuable industry connections

6

Placement Assistance

- Continuous job support until placement
- Interview scheduling & company connections
- Guidance for freelancing opportunities

7

Certification & Internship

- Industry-recognized UI/UX certificate
- Internship experience for practical exposure
- Strengthen your professional profile
